SERVICE MANUAL

*US Model
Canadian Model
AEP Model
E Model
Australian Model*

SPECIFICATIONS

Frequency range	Model for North and South America FM: 87.5 – 108 MHz AM: 530 – 1,710 kHz Model for other countries FM: 87.5 – 108 MHz AM: 531 – 1,602 kHz Intermediate frequency FM: 10.7 MHz AM: 450 kHz	Antennas Speaker Power output Power requirements	FM: FM wire antenna AM: Built-in ferrite bar antenna Approx. 6.6 cm (2 5/8 inches) dia. 120 mW (at 10% harmonic distortion) North and South American model: 120 V AC, 60 Hz UK model: 240 V AC, 50 Hz Other models: 220 – 230 V AC, 50 Hz Approx. 115 x 110 x 105 mm (w/h/d) (4 5/8 x 4 3/8 x 4 1/4 inches) incl. projecting parts and controls
Scan step	Model for North and South America FM: 0.1 MHz (fixed) AM: 10 kHz (fixed) Model for other countries FM: 0.05* MHz (fixed) AM: 9 kHz (fixed) * The frequency display is raised or lowered by steps of 0.1 MHz. (Example: Frequency 88.05 MHz is displayed as "88.0 MHz".)	Dimensions Weight Accessory supplied	Design and specifications are subject to change without notice. Note This appliance conforms with EEC Directive 87/308/EEC regarding interference suppression.

**FM/AM PLL SYNTHESIZED
CLOCK RADIO**
SONY®

SAFETY CHECK-OUT

After correcting the original service problem, perform the following safety check before releasing the set to the customer:

Check the antenna terminals, metal trim, "metallized" knobs, screws, and all other exposed metal parts for AC leakage. Check leakage as described below.

LEAKAGE TEST

The AC leakage from any exposed metal part to earth ground and from all exposed metal parts to any exposed metal part having a return to chassis, must not exceed 0.5 mA (500 microamperes). Leakage current can be measured by any one of three methods.

1. A commercial leakage tester, such as the Simpson 229 or RCA WT-540A. Follow the manufacturers' instructions to use these instruments.
2. A battery-operated AC milliammeter. The Data Precision 245 digital multimeter is suitable for this job.
3. Measuring the voltage drop across a resistor by means of a VOM or battery-operated AC voltmeter. The "limit" indication is 0.75 V, so analog meters must have an accurate low-voltage scale. The Simpson 250 and Sanwa SH-63Trd are examples of a passive VOM that is suitable. Nearly all battery operated digital multimeters that have a 2 V AC range are suitable. (See Fig. A)

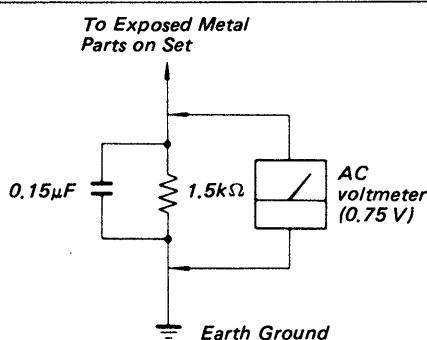

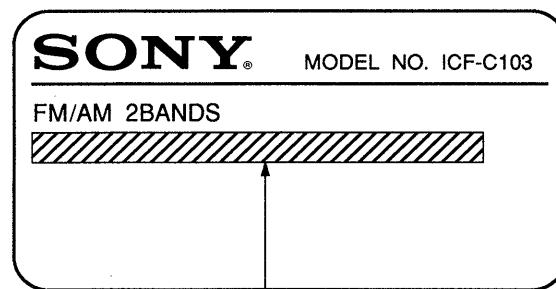

Fig. A. Using an AC voltmeter to check AC leakage.

MODEL IDENTIFICATION

— Model Number Portion —

US, Canadian model : AC : 120V ~ 60Hz 3W
AEP, Italian, E model : AC : 220~230V ~ 50Hz 3W
Australian model : AC : 240V ~ 50Hz 3W

SAFETY-RELATED COMPONENT WARNING!!

COMPONENTS IDENTIFIED BY MARK OR DOTTED LINE WITH MARK ON THE SCHEMATIC DIAGRAMS AND IN THE PARTS LIST ARE CRITICAL TO SAFE OPERATION. REPLACE THESE COMPONENTS WITH SONY PARTS WHOSE PART NUMBERS APPEAR AS SHOWN IN THIS MANUAL OR IN SUPPLEMENTS PUBLISHED BY SONY.

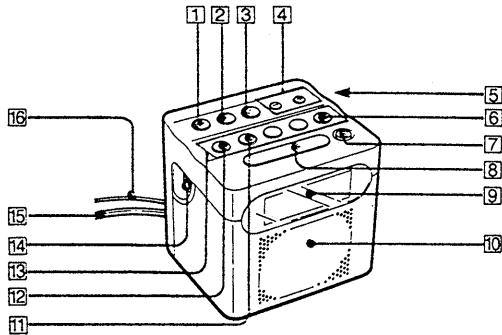

ATTENTION AU COMPOSANT AYANT RAPPORT À LA SÉCURITÉ!

LES COMPOSANTS IDENTIFIÉS PAR UNE MARQUE SUR LES DIAGRAMMES SCHÉMATIQUES ET LA LISTE DES PIÈCES SONT CRITIQUES POUR LA SÉCURITÉ DE FONCTIONNEMENT. NE REMPLACER CES COMPOSANTS QUE PAR DES PIÈCES SONY DONT LES NUMÉROS SONT DONNÉS DANS CE MANUEL OU DANS LES SUPPLÉMENTS PUBLIÉS PAR SONY.

SECTION 1 GENERAL

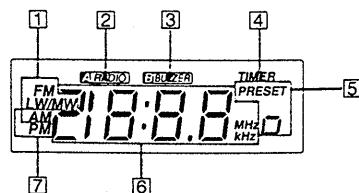

This section is extracted
from instruction manual.

Location of Controls

- ① ALARM RESET/RADIO OFF button
- ② SLEEP/RADIO ON button
- ③ BAND button
- ④ TIME SET/TUNE (tuning) + and - buttons
- ⑤ VOL (volume) control (right side)
- ⑥ ALARM MODE button
- ⑦ TIMER (count down timer) button
- ⑧ REPEAT ALARM/SLEEP OFF bar
- ⑨ Display window
- ⑩ Speaker
- ⑪ B BUZZER ALARM button
- ⑫ A RADIO ALARM (WAKE UP STATION) button
- ⑬ Preset number 1 – 5 buttons
- ⑭ ENTER/CLOCK button
- ⑮ AC power cord
- ⑯ FM wire antenna

Display window

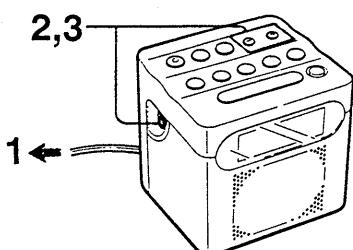

6

7

Setting the Time

After connecting the AC power cord, be sure to set the time.

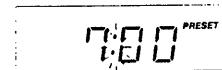

1 Connect the AC power cord to a wall outlet.

Time indication appears
and flashes in the display
window.

2 While keeping the ENTER/CLOCK button pressed,
press the TIME SET/TUNE + or - button to set the time.

The + button advances the
hour and minute digits and
the - button reverses them.
Keep pressing the + or -
button to advance or
reverse the digit rapidly.

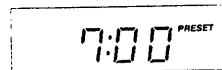

3 Release the ENTER/CLOCK button.
The clock starts operating.

Note on the Time indication

When the radio is on, ":" of the time indication is lit, and when the radio is off, the ":" is flashing.

Radio is on.

Radio is off.

(The illustrations of the time indication in this manual are for models
with 24-hour system.)

Zero second adjustment

At step 3, release the ENTER/CLOCK button with the time signal.

8

9

Radio Operation (Manual Tuning)

1 Press the SLEEP/RADIO **ON** button.
The band, frequency and the preset number of the station before the radio was turned off appear in the display window. After 10 seconds, the indication becomes the current time.

2 Turn the **VOL** control a little to get sound.

3 Press the **BAND** button to select the band.
Each press of the BAND button changes the band in the following order.
→ LW → AM (MW) → FM →

(The display window shows the last frequency chosen in each band.)

4 Tune in the station you want by pressing the **TIME SET/TUNE + or -** button.
The FM tuning interval is set to 0.1 MHz and the AM tuning interval is set to 10 kHz for models for North and South America.
The FM tuning interval is set to 0.05 MHz and the AM tuning interval is set to 9 kHz for models for other countries.
(The FM frequency indication changes every 0.1 MHz.) The LW tuning interval alternates between 2 kHz and 7 kHz.
A beep sounds at the band edge.

5 Adjust volume.

10

11

Radio Operation (Manual Tuning)

To turn off the radio

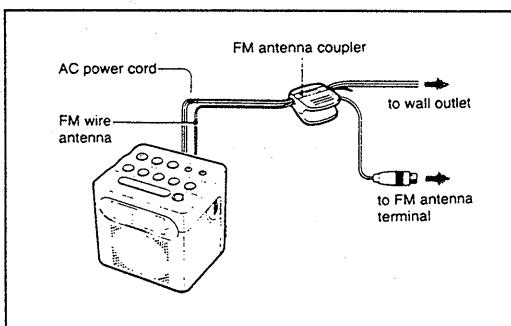

Press the **ALARM RESET/RADIO OFF** button.

To improve reception

FM: Extend the FM wire antenna fully to increase the FM sensitivity.

AM (MW)/LW: Since the reception is affected by the position of the radio, rotate the unit horizontally for optimum reception.

For the customers supplied with an FM antenna coupler
Pinch the FM wire antenna and the AC power cord together with the coupler supplied and connect it to a wall FM antenna terminal for optimum FM reception.

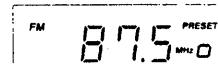

To check the station you are listening to

Press the **+** button lightly. The band and frequency appear for 10 seconds.

Notes

- When you turn on the radio or change the frequency, the display shows the band and frequency for 10 seconds, then it shows the current time.
- When you tune in the frequency which is not included in the preset stations, the PRESET number in the display shows **0** (out).

- If the **A RADIO** alarm time comes while listening to the radio, the station changes to that preset in number 1.

12

13

Radio Operation (Preset Tuning)

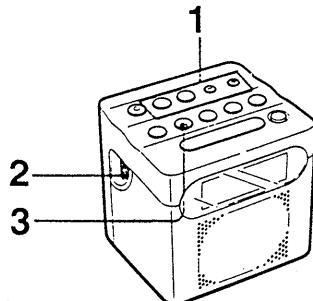

You can preset up to five FM/AM (MW)/LW stations (one station for each number button 1 to 5).

Note

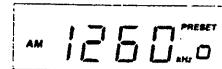

When you use the radio alarm, preset the station you want for the alarm in preset button 1, as the PRESET 1 station is the wake up station.

Presetting the Station

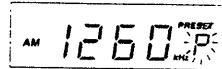

Example: To set AM (MW) 1,260 kHz in preset button 2

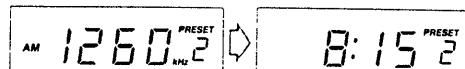

- 1** Tune in the AM (MW) 1,260 kHz (see "Radio Operation (Manual Tuning)").

- 2** Press the ENTER/CLOCK button.
The P indication flashes for 10 seconds.

- 3** While P is flashing, press the 2 button.
The P indication becomes 2 (the preset number) and the beeps sound.
The station is preset.
Though the indication becomes the current time after 10 seconds, the preset number remains.

- 4** Repeat steps 1 to 3 for each stations to be preset.

To change the preset station

Preset a new station in the number of which you want to change the station. The previous station is canceled.

14

15

Radio Operation (Preset Tuning)

Tuning in a Preset Station

- 1** Press the RADIO [ON] button to turn on the radio.
- 2** Press the preset number button of the station.
The band, frequency and preset number appear in the display window. After 10 seconds, the indication becomes the current time.
The preset number remains.

To turn off the radio
Press the RADIO [OFF] button.

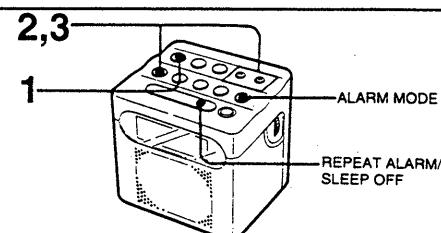

To check the station you are listening to
Press the preset number button.
The band and frequency appear for 10 seconds.

Setting the Alarm

You can set the radio and buzzer alarms. The wake up station is that preset in number 1.

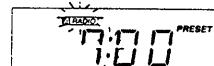

Setting the Alarm Time

To set the [A RADIO] alarm time at 7:00 AM

- 1** Turn off the radio.

- 2** While keeping the [A RADIO] ALARM button pressed, set the time by pressing the TIME SET/TUNE + or - button.

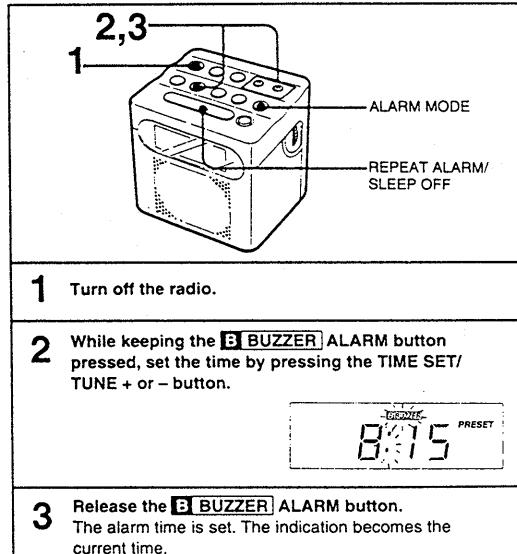

- 3** Release the [A RADIO] ALARM button.
The alarm time is set. The indication becomes the current time.

16

17

Setting the Alarm

To set the **B BUZZER** alarm time at 8:15 AM

Notes

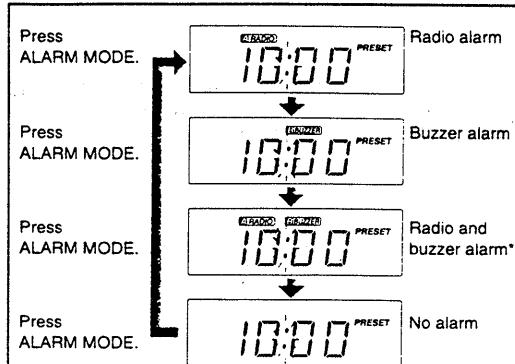

- The wake up station is the PRESET 1 station. Preset the station you want for the radio alarm in preset button 1.
- When you set both **A RADIO** and **B BUZZER** alarms continuously, perform from step 2 above.

18

Setting the Alarm

Press the **ALARM MODE** button until the alarm you want appears in the display window.

Each time you press the button, the alarm indication changes as follows.

* If you set the radio alarm and buzzer alarm at the same time, the radio alarm sounds.

- The selected alarm sounds at the time you set, and automatically turns off after 59 minutes, unless you turn it off.
- When the radio alarm comes on, **A RADIO** indication flashes. If you want to keep on listening to radio and stop flashing, press the **RADIO ON** button.

19

Setting the Alarm

To stop the alarm

Press the **ALARM RESET/RADIO OFF** button.
 The alarm will sound at same time the next day.

To cancel the alarm

Press the **ALARM MODE** button until neither **A RADIO** nor **B BUZZER** appears in the display window.

Using the Snooze Alarm Function

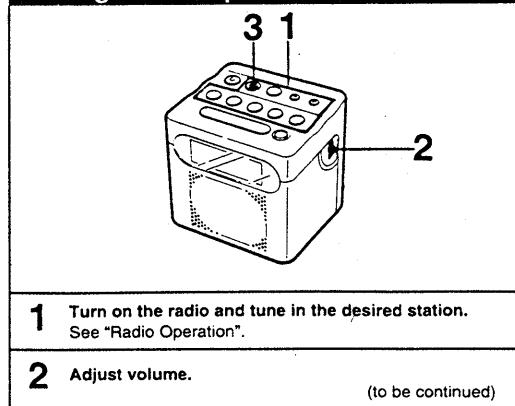

When you awake to the alarm but want to stay in bed for a few more minutes, press the **REPEAT ALARM/SLEEP OFF** bar. The alarm will be silenced but will come on again after about 8 minutes. If you want to snooze more, press the bar again. You can use the snooze alarm function for about one hour. When the snooze alarm function is operating, the alarm indication flashes.

20

Using the Sleep Timer

By setting the sleep timer, you can fall asleep to the radio sound. The radio turns off after the preset time has passed. You can set the sleep timer of 90, 60, 30, or 15 minutes.

Setting the Sleep Timer

21

Using the Sleep Timer

3 Press the SLEEP/RADIO **ON** button until the minutes indication you want appears in the display window.

Each time you press the button, the operation time becomes shorter.

To turn off the radio after 60 minutes

The sleep timer is set and the indication becomes the band and frequency, then the current time after 10 seconds each.

Sleep timer operation time

Press SLEEP/ RADIO ON	Indication	Operation time
once	On	Radio on
twice	90	90 minutes
three times	60	60 minutes
four times	30	30 minutes
five times	15	15 minutes
six times	20:30	Radio off

To use both sleep timer and alarm function

Operate in the following order to fall asleep to the radio sound and be awoken by the radio/buzzer alarm at the preset time.

1 Set the alarm. (See "Setting the Alarm".)

2 Set the sleep timer. (See "Using the Sleep Timer".)

22

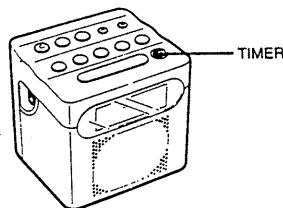

23

Using the Count Down Timer

Use the count down timer as a reminder. The beep sounds for 1 minute when the preset time has passed. The beep sounds when the radio is either on or off.

You can set the timer of 3, 5, 10, 15, 30, or 60 minutes.

Setting the Timer

Press the **TIMER** button. While the **TIMER** indication is flashing, press the **TIMER** button until the time you want the beep to sound appears.

Each time you press the button, the indication changes:

03 → 05 → 10 → 15 → 30 → 60 → OFF (no timer)

To set the 15 minutes timer

The timer is set. When the radio is off, the indication becomes the current time.

When the radio is on, the indication becomes the frequency, then becomes the current time after 10 seconds.

When the preset time has passed, the **TIMER** indication flashes and beep sounds. The radio is turned off.

To change the timer setting time

Press the **TIMER** button until the time you want appears.

The indication starts from 03 again.

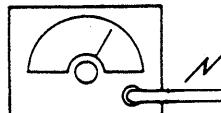

24

25

SECTION 2 ELECTRICAL ADJUSTMENTS

AM Section

AM RF signal generator

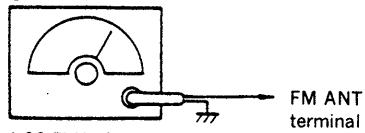

Put the lead-wire antenna close to the set.

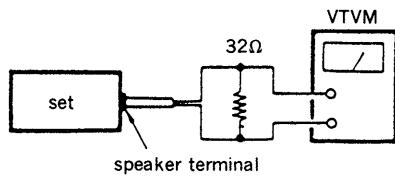

30 % amplitude modulation by 400Hz signal
Output level: as low as possible

FM Section

FM RF signal generator

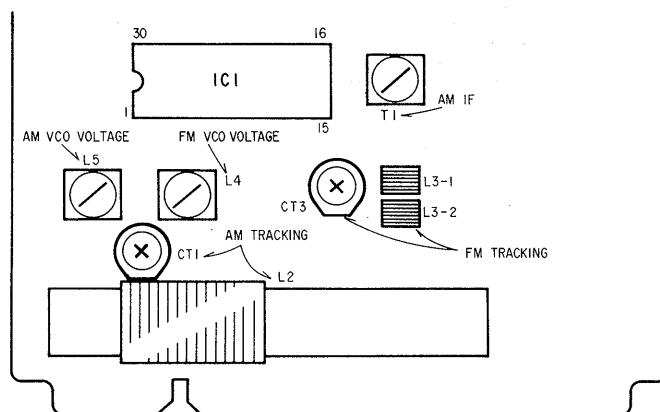

$\pm 22.5\text{kHz}$ frequency deviation by 400Hz signal
Output level: as low as possible

- Repeat the procedures in each adjustment several times, and the tracking adjustments should be finally the trimmer capacitors.

Adjustment Location :

【MAIN BOARD】 — COMPONENT SIDE —

() : EXCEPT US, CND model

AM IF ADJUSTMENT

Adjust for a maximum reading on VTVM.

T1	450kHz
----	--------

Note : Receive 530kHz (531kHz).

AM VCO VOLTAGE ADJUSTMENT

Adjustment Part	Frequency Display	Reading on Digital voltmeter
L5	530kHz (531kHz)	1.2V
(confirmation)	1,710kHz (1,602kHz)	Less than 9V (Less than 8V)

Note : Not use the AM RF signal generator in this adjustment.

AM TRACKING ADJUSTMENT

Adjust for a maximum reading on VTVM.

CT1	L2
1,490kHz (1,404kHz)	580kHz (621kHz)

FM VCO VOLTAGE ADJUSTMENT

Adjustment Part	Frequency Display	Reading on Digital voltmeter
L4	108MHz	10 \pm 1.0V
(confirmation)	87.5MHz	More than 1.8V (Standard 2.2V)

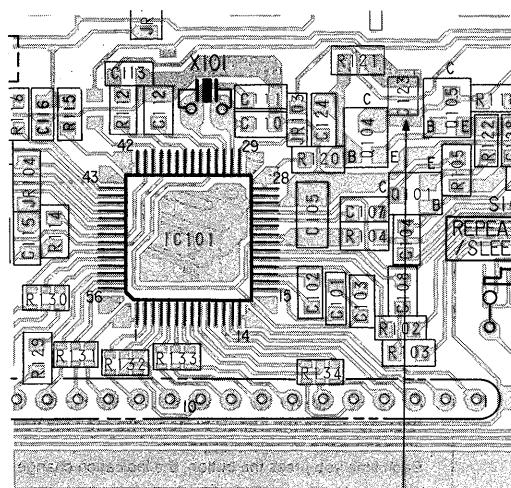

Note : Not use the FM signal generator in this adjustment.

FM TRACKING ADJUSTMENT

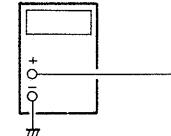

Adjust for a maximum reading on VTVM.

CT3	L3-1, L3-2
108MHz	87.5MHz
